

FULL STACK DEVELOPMENT Career Program

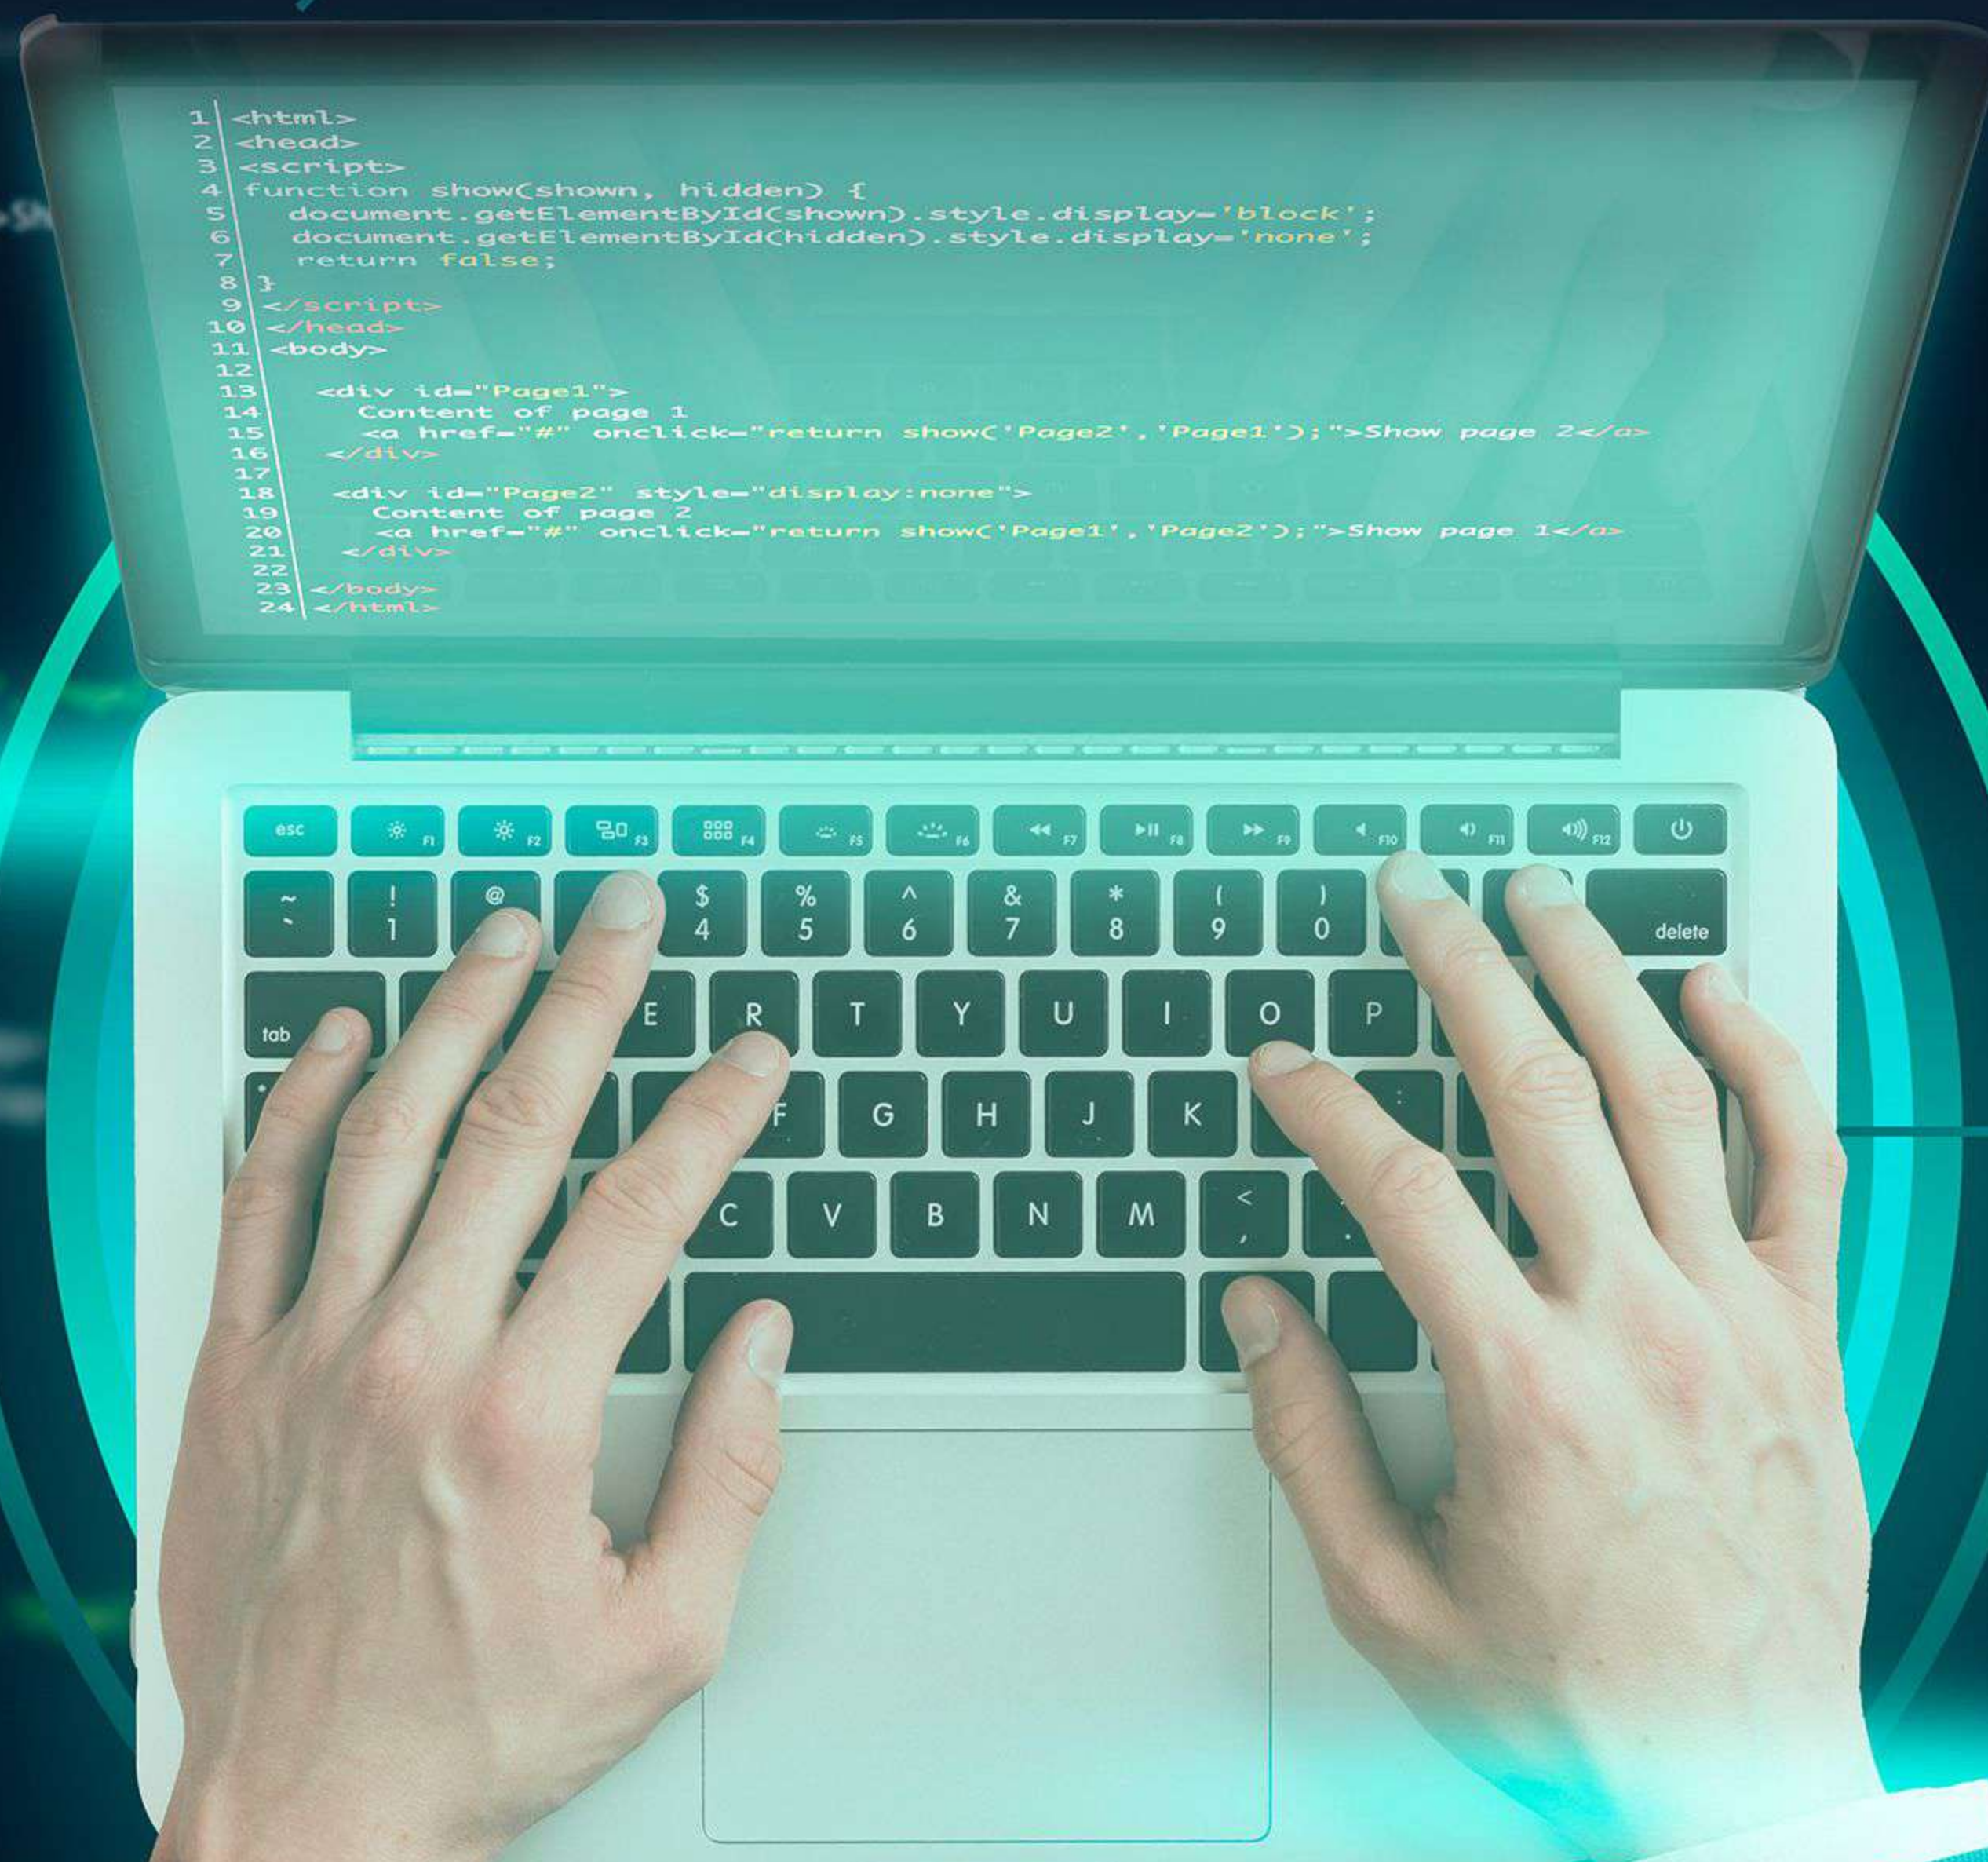

HTML

The HyperText Markup Language or HTML is the standard markup language for documents designed to be displayed in a web browser. It can be assisted by technologies such as Cascading Style Sheets and scripting languages such as JavaScript.

CSS

Cascading Style Sheets is a style sheet language used for describing the presentation of a document written in a markup language such as HTML or XML. CSS is a cornerstone technology of the World Wide Web, alongside HTML and JavaScript.

About Full Stack Development

- **What is Full Stack Development** - Ever wondered, how do applications like Facebook, Netflix, Amazon work so smoothly taking you from one page to another, keeping you entertained, informed, captivated, and in trend??

If yes, then you are also probably wondering who builds them and how, well if you are looking for these answers then you are at the right place.

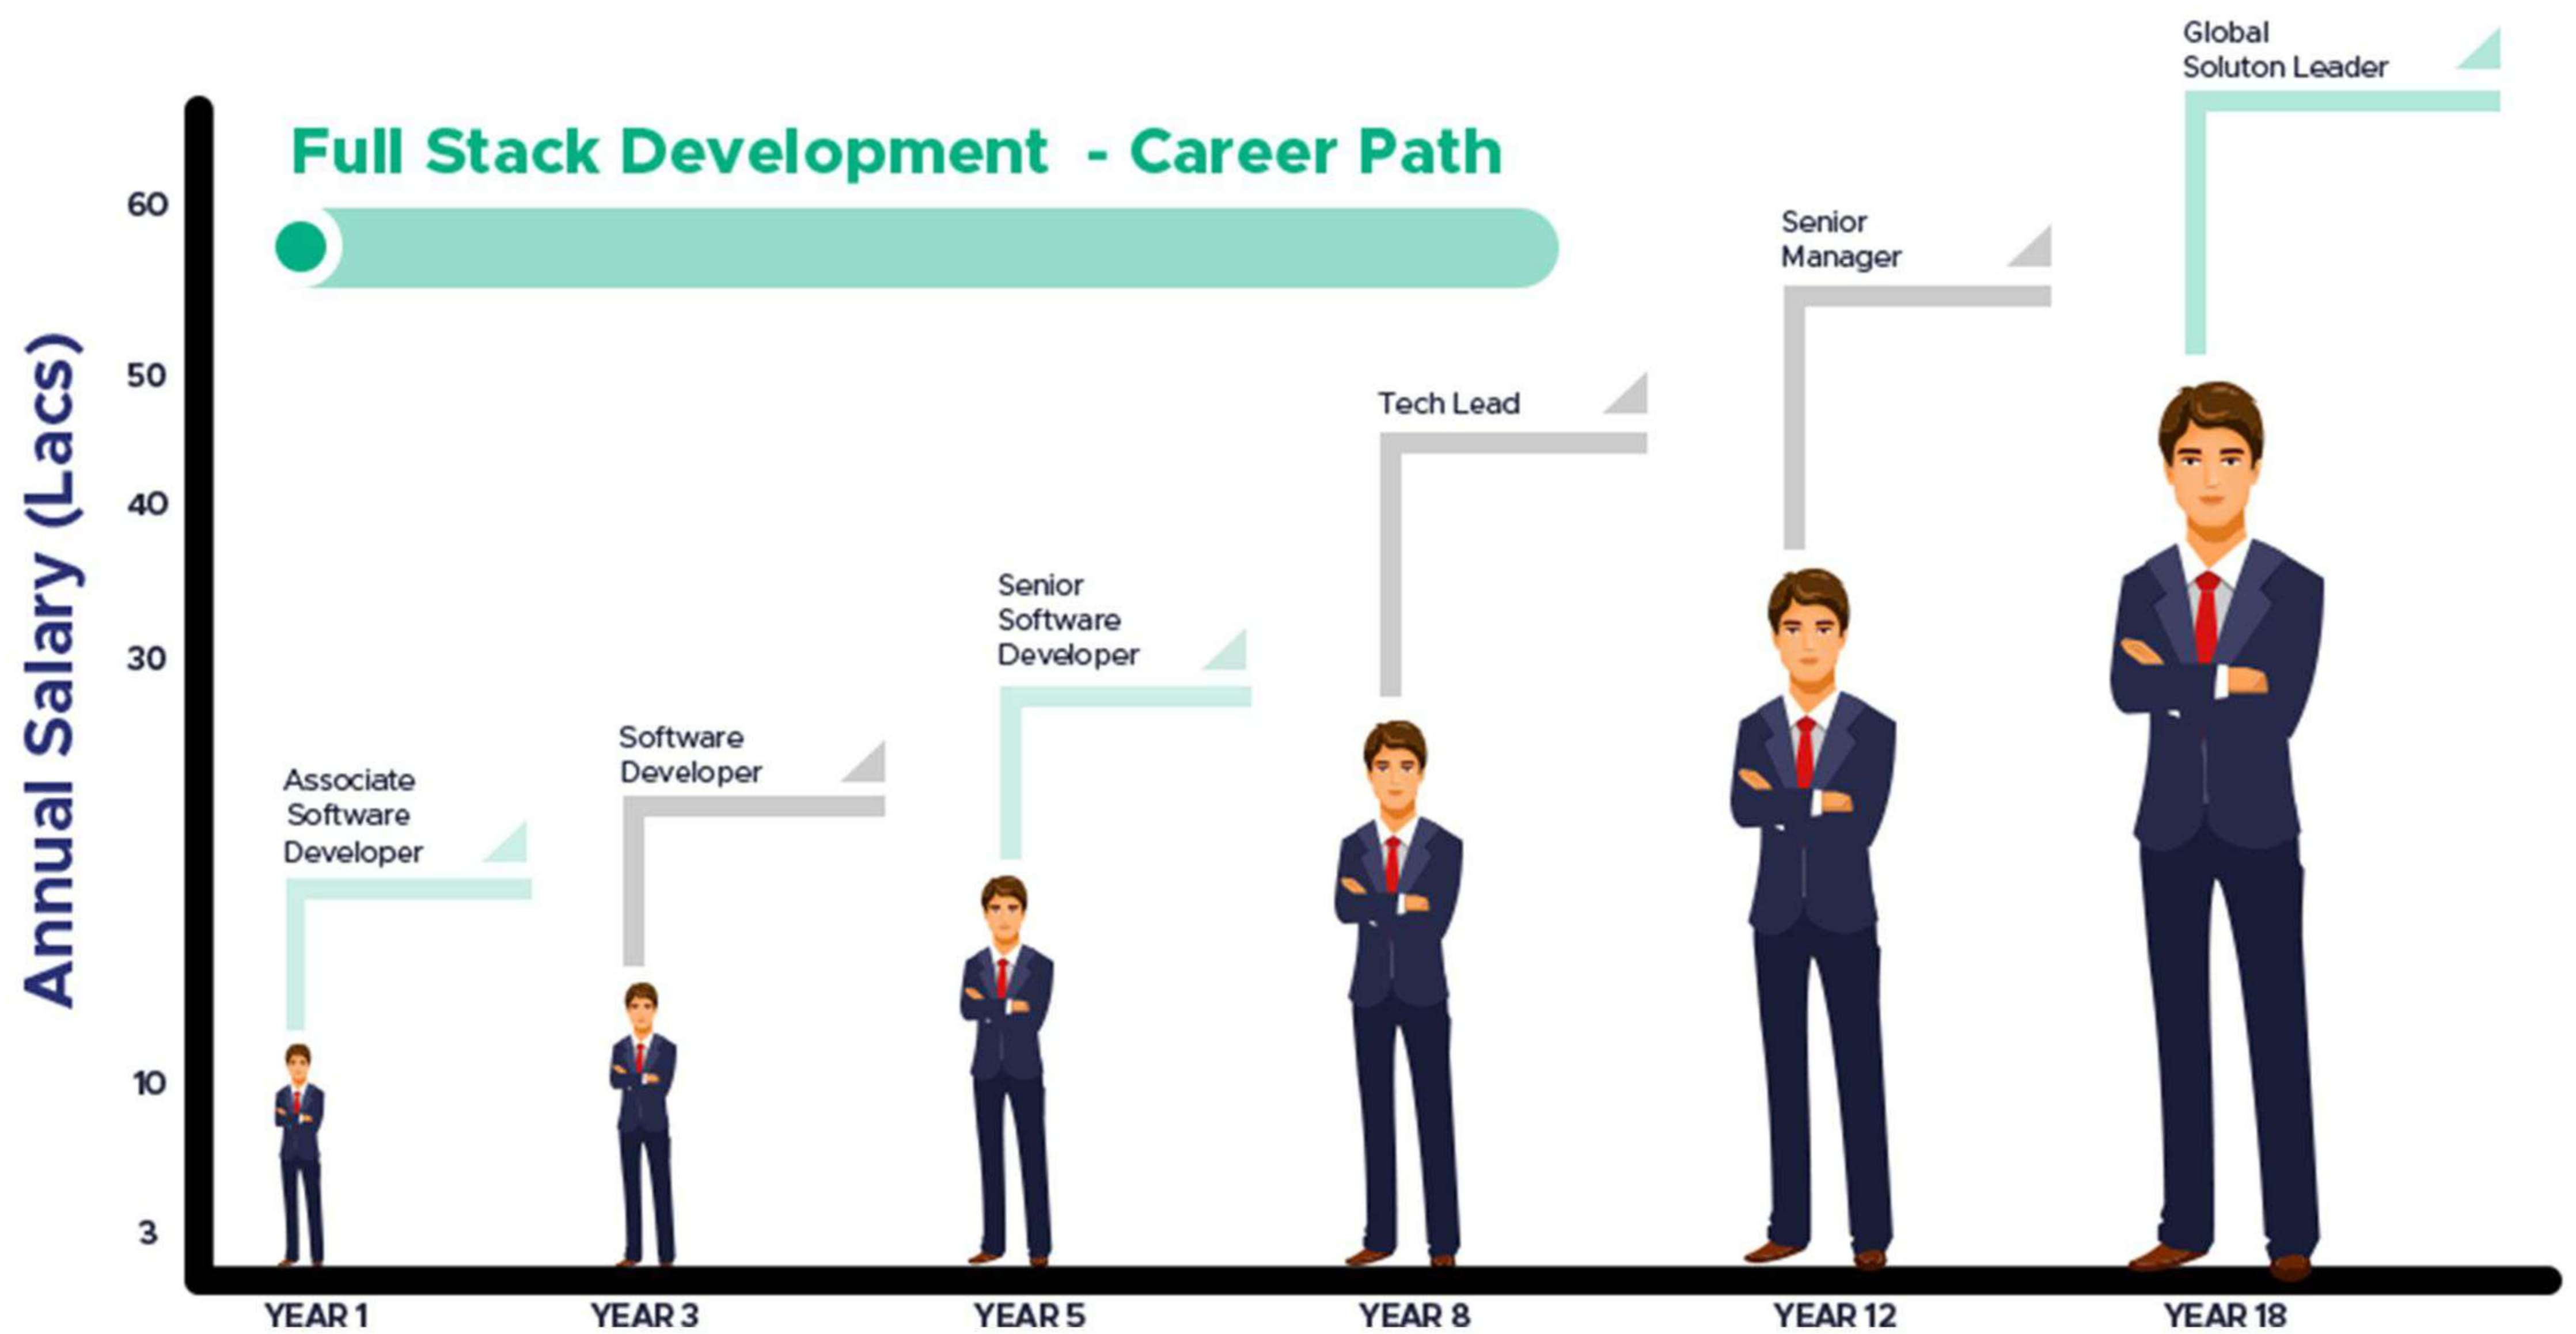

When you navigate through a well designed website with an easy to use interface with a million of other users using it other than you, a full stack developer is at work, who makes sure your all around experience around the application is seamless. A Full Stack Developer is someone who has complete information of all layers of an application including both front-end and back-end, and so is responsible for maintaining the application end-to-end.

Full stack developers possess all the required skills for creating a web-application from scratch and then maintaining it.

- **Why Full Stack Development**

- **Career Prospects** - The future has a lot of opportunities once you get your foot into technology as from there you can master any of the fields including front-end development, back-end development, database administration, or finally a full stack developer as well.
- **High pay** - As the demand increases so does the pay. As the requirement of skilled full stack developers is always increasing with tons of startups opening on a daily basis, so the sector of full stack development would keep on seeing a rise in average salary for a foreseeable future.
- **In-demand job** - A full stack web developer has become the most sought after job profile for the past few years. Every organization is looking for a seamless experience and this is easily achieved when there is just one person to do both client-side and server-side coding. Two people also mean more salary and resources and ideas.
- **Everything is on the internet** - As we have seen the trend that all businesses are now online whole marketplace is now digital and not just marketplace, today even the scope of existence is getting shifted online with the growing social media. So who are the one creating these online spaces to either do business or talk to your friends??.....They are the developers turning this dream into a possibility.

Key Highlights of the “Full Stack Developer Career Program”

9 Month Program

Fast paced Comprehensive Program with Industry Experts led Training.

5 Major Projects & 100+ Assignments. Hackathons

Work on real industry level projects designed by experts for practical learning.

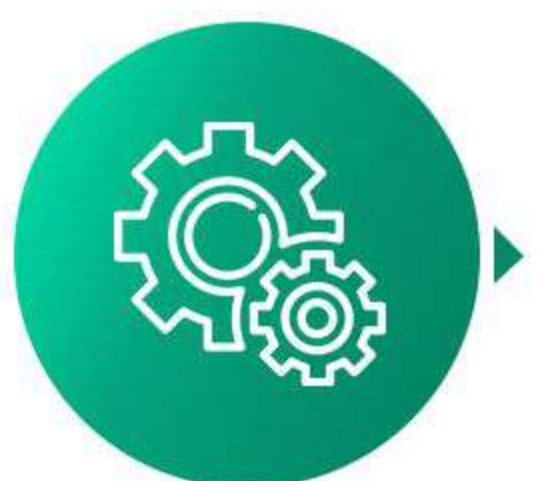

200+ Hours of Videos & Live Sessions

Recorded videos during weekdays at your convenient time.
Live training sessions during weekends.

1-to-1 Doubt Clearing Sessions

Mentorship & doubt solving through one-to-one or one-to-many sessions by industry Experts

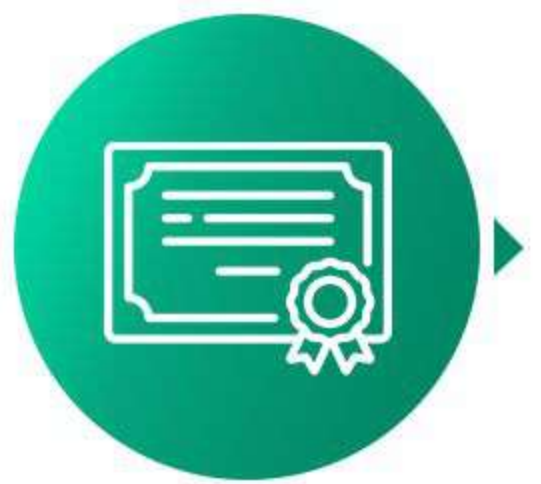

Latest Tools & Technologies

HTML & CSS, JavaScript, MERN Stack, DSA

Complete Placement Preparation

Become job ready through soft skills training, resume and profile building and mock interviews.

Industry-Recognised Completion Certificate & Internship Certificate

Highlight your resume

Jobs Roles that will open-up after this course

Full Stack Developer, Front end developer, UI Developer, React Developer, Web Developer etc.

Learning Journey

WEEK 1 - WEEK 6

Orientation Session

Learn about the program, understand the flow and fixtures

WEEK 7 - WEEK 8

HTML

Start your journey with HTML and build some static web applications

WEEK 9 - WEEK 12

CSS

Learn CSS and add styling to your static pages with different CSS styling schemes

WEEK 13 - WEEK 20

JavaScript

Learn JavaScript as your first programming language

WEEK 21 - WEEK 28

Data Structures and Algorithms

Learn DSA using JavaScript and build strong coding profile and crack your coding interviews

WEEK 29 - WEEK 33

Back end Technologies

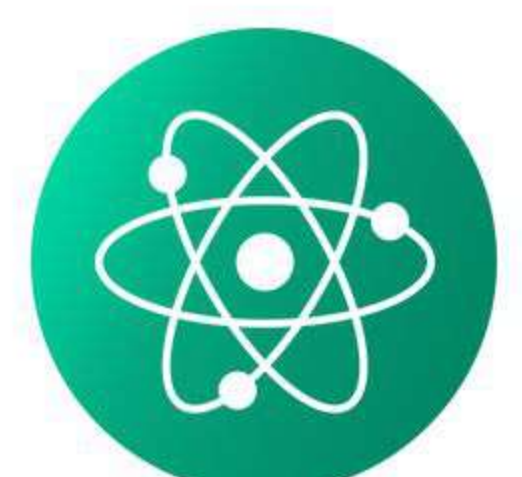

Learn Server side programming with Node.js, Express.js and MongoDB

WEEK 34 - WEEK 38

React.js

Learn React.js framework and ease your development for front-end requirements

“

Ankit Arul

It was a wonderful experience with Skill Academy, it helped me to gain sound knowledge on core concepts of web development. They nurtured me right from the scratch and helped me conquer the correct skill required for being a good developer. I sincerely thank Skill Academy.

”

“

Tejas

I am from a non-CS background but Skill Academy course is beginners friendly. They taught the course from scratch and teach us to advance to make us proper a full stack developer, there is a dedicated team behind this Course, mentors team are super helpful.

”

“

Atul Chowdhary

Testbook is a good platform to improve your skills and knowledge. I have enrolled in FSD program. In this program i have learn so many languages like HTML, CSS and JavaScript and framework like bootstrap and various libraries like mongo DB and node JS. I have also learnt soft skills and communication that is important for job interviews. All the live sessions and recorded videos are clear and informative. Faculties and Mentors are very knowledgable & supportive to solve your queries .This program help me improve my skills and better shape my career in field of IT.

”

“

Pradeep Gupta

After joining skill academy I am so happy and it's also improve my skill at the lowest price I got the best skill course from skill academy.

”

Curriculum Details

01 Front-end technologies

- Start your programming journey with easier modules of front-end technologies.
- Learn tags in HTML
- Learn styling with CSS.
- Course Project - Create your first ever web application using the concepts learnt, and create a social media static application

02 JavaScript

- Learn your first programming language to be used for both front-end development and also for back-end development.
- Learn to add functionalities using JavaScript to your static applications.
- Understand the concepts of conditionals, loops, asynchronous programming, etc..
- Course Project - Create a Mock test Series assessment Platform.

03 Data Structures and Algorithms

- Learn Linear and complex Data Structures and get prepared for your interviews
- Learn concepts of Time and Space Complexity.
- Topics covered - Iteration, Recursion, Linked Lists, Queues, HashMaps, Stacks, Trees, Dynamic programming, Graphs, etc.
- Mock Test Series along with the program to test your coding skills.

04 Backend Frameworks

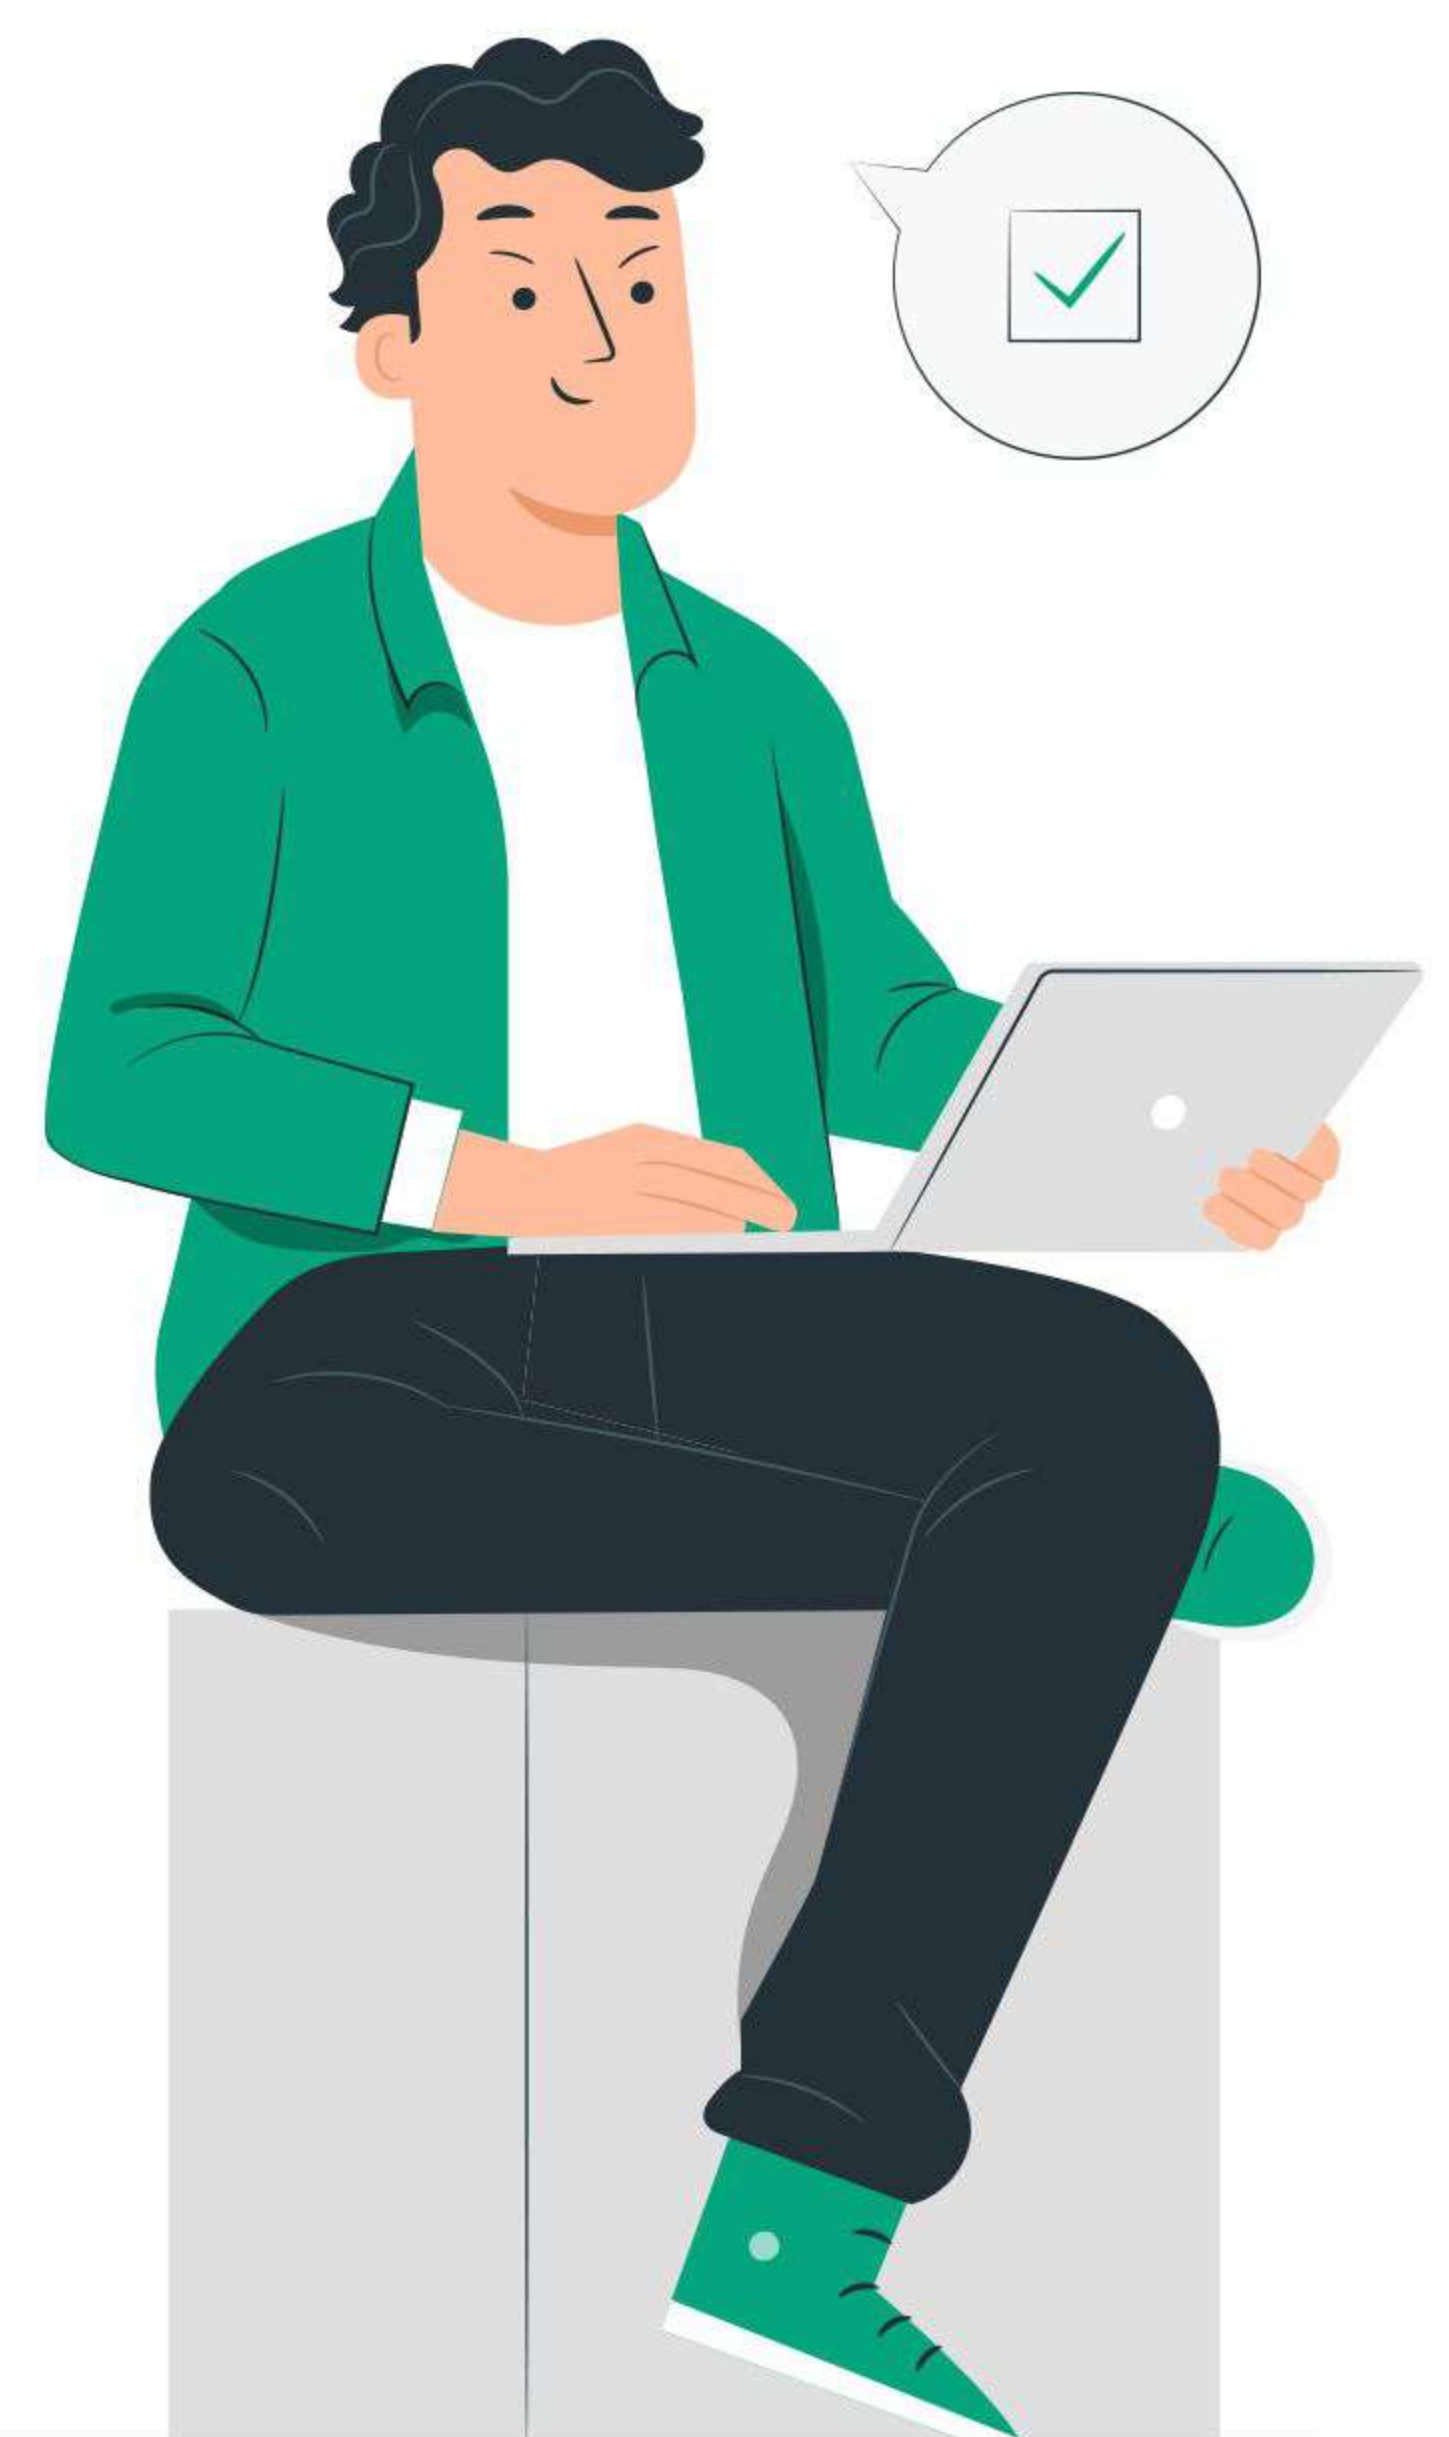

- Learn Server side programming with Node.js, Express.js
- Learn your first Non-Relational Database Management System as MongoDB
- Add real time data to your web applications with the use of APIs.
- Course Project - Create a Hotel Booking Application.

05 Advanced Front-end Frameworks

- Learn React.js as your Front-end framework.
- Create appealing and smooth user interfaces using concepts in React
- Learn to create components, and manage their lifecycle using Hooks.
- Course Project - Create a social media application

06 Capstone Project

- Create an end-to-end E-commerce application

About Skill Academy by Testbook

Testbook is a one-stop solution for all job seekers - government and private. With over 2.8 Cr students, attempting 242 Cr+ tests, Testbook is poised to change the EdTech industry as the fastest-growing startup.

Today, Testbook is on a mission to revolutionize the way students prepare for competitive exams and interviews. With self-paced coaching by best-in-industry trainers, handpicked modules and a result-oriented pedagogy, Testbook has come a long way with over 50K selections in competitive exams over the years.
